12 15

Ok, i've been screwing around too much, im gonna knock out an mvp from scratch today.

step 1
init next project - done

step 2
next auth - done
mongodb -done

step 3
upload user plant data-done
fetch user plant data-done
my plants page - almost done

step 4
build routines

server side session

```
import { authOptions } from "@/app/api/auth/[...nextauth]/route";

export default async function ServerProfile() {
  const session = await getServerSession(authOptions);

  if (!session) {
    return <p>Not logged in</p>;
  }

  return (
    <div>
      <p>Welcome, {session.user.name}</p>
      <p>User ID: {session.user.id}</p> {/* Access the `sub` (user ID) */}
    </div>
  );
}
```

client side session

```
"use client";

import { useSession } from "next-auth/react";

export default function Profile() {
```

```
  const { data: session, status } = useSession();

  if (status === "loading") {
    return <p>Loading...</p>;
  }

  if (!session) {
    return <p>Not logged in</p>;
  }

  return (
    <div>
      <p>Welcome, {session.user.name}</p>
      <p>User ID: {session.user.id}</p> {/* Access the JWT `sub` here */}
    </div>
  );
}
```
